### NOTICE OF TECHNICAL MEETING

**VENUE:** ACRA, 203 ELEMENT ROAD, CHLOOKOP,  
KEMPTON PARK

**DATE:** 15 FEBRUARY 2018

**TIME:** 18H00 for 18h30

**SPEAKER:** DEWALD COETZEE

### SYNOPSIS OF TALK

#### Description

GripplE Ltd designs, manufactures, and markets wire joiners and tensioning devices for agricultural and industrial markets. It offers building services, including mechanical and electrical, plumbing, HVAC, lightings, signage and shop fitting, catenaries, sleeving solutions, acoustic panels, food/humid environments, and arts and culture. The company also provides seismic and force protection, civil construction, and landscaping and nurseries services, as well as viticulture, orchards, and fencing services. It sells its products through a network of distributors in the United Kingdom and internationally, as well as online. GripplE Ltd was incorporated in 1983 and is based in Sheffield, United Kingdom.

#### HVAC Services Case Study

The labour time for installing ductwork with GripplE products can be reduced by up to 78% (depending on the size and type of the duct). Health and safety was also improved as no channel is required, so no cutting, filling or hot works were needed to suspend the ductwork.

#### Electrical Services Case Study

Installing 200 brackets with threaded rod would have taken 136 hours. With GripplE it took 40 hours - a time saving of 71%. This saving in time saving equates to a reduction in labour costs up to 30%. The Trapeze No.2 is ideal for the suspension of single and multi-tiered brackets, its unique tapered, discreet design slots completely into the channel. To ease working at height it can be pre-fitted to the channel with the pin adjustment making it quick and easy to adjust / set on the length of wire.
